

**Upper Sandy River Pond**  
Sandy River Plt., Franklin County  
U.S.G.S. Saddleback Mountain, Maine (7½')

**Fishes**

Brook trout	Blacknose dace
Rainbow smelt	Creek chub
Minnnows	Longnose sucker
Lake chub	White sucker
Golden shiner	Hornpout (bullhead)

**Physical Characteristics**

Area - 28 acres	Temperatures
	Surface - 68°F
Maximum depth - 14 feet	13 feet - 67°F

**Principal fisheries: Brook trout**

Upper Sandy River Pond, located southwest of Saddleback Mountain, is the western-most in a series of three ponds. Its main inlet enters the west side of the pond and its short outlet flows east into Middle Sandy River Pond. The pond's shoreline is lightly developed.

Water quality in Upper Sandy River Pond is marginal for coldwater gamefish, with warm water temperature from top to bottom during the summer months. The pond has limited spawning areas and the pond is not stocked. Despite this a few brook trout, both wild and hatchery

from the middle pond, provide a limited fishery. Growth is good despite heavy competition from other fish species.

Upper Sandy River Pond is accessible by foot from Route 4 or by a small boat up the outlet. The pond is open to fishing in the summer with the use of live bait being prohibited. It is closed to icefishing. See the lawbook for additional regulations.
